

# Movie Screens

## Meese

what you heard was  
coming from the lips of devils  
spelling out the words on black boards  
for everyone to see  
for everyone to seemy subconscious  
is working off the clock again  
he's blacking out the worst of it  
filtering the rest  
filtering the...do we think the walls are closer than they seem  
and i am close to you and i lost everything  
and she said to be careful, i am careful, i seeghost following me, watching my memories on movie screens  
and ghost calling my name, from places we used to live when we were kids  
and ghost following me, watching my memories on movie screens  
and ghost calling my name, from places we used to live when we were kids  
back homewhat you saw was  
an angel that was cast from shadows  
streching on for miles and miles  
for everyone to see  
for everyone toyou clear the hurdle,  
theres another in its place  
we fall to pieces for another pretty face  
and she said to be careful, i am careful, i seeghost following me, watching my memories on movie screens  
and ghost calling my name, from places we used to live when we were kids  
and ghost following me, watching my memories on movie screens  
and ghost calling my name, from places we used to live when we were kids  
back home
