

# The Scientists

[Cris Velasco & Sascha Dikiciyan](#)

Electrified and lit up by an outline of herself  
And smiling now as only she can be  
She said, "I made some new connections to astound them all  
In ways we've never dreamed about" Her lovely hand is glowing from a light inside itself  
From soaking in the esters stacked for miles on a single shelf  
Holding my eyes still  
So she can see all the super-undercover custom hybrids got to me It's too much, you're too late, I want to see it  
all again  
She says, "Keep this benzene ring around your finger  
And think of me when everything you wanted starts to end" And I saw living lusters form in pools beneath her  
feet  
Invertebrates that only she can see  
And I said, "What on Earth are all these ampules for?"  
She says exactly, "We're not gonna wait around here anymore" Systems back down slow, watch the dust cloud  
we send  
And I will keep you, I will keep you to the end  
Set your head back low, watch my ears ring  
I will take care of you, I will take care of everything Systems back down slow, watch the dust cloud we send  
And I will keep you, I will keep you to the end  
Set your head back low, watch my ears ring  
I will take care of you, I will take care of everything It's too much you're too late  
Too much you're too late  
Piloting my head spins to the ground  
And I think, I see myself again  
Through the pinhole But the pinhole captures all of you  
And the pinhole captures all of you  
And the pinhole captures all of you  
And the pinhole captures all of you  
And the pinhole captures all of you Too much, you're too late  
Too much, you're too late  
Too much, you're too late  
Too much, you're too late
