

Disappear

Leonardo's Bride

You make me feel like I'm so worthless
You cut me down like a pedestrian
You make me run when I'm happy walking
You pick me up and put me down again I don't need you hanging round me
I don't need you in my ear I look at you and it makes me nervous
I hope I don't turn out that way
You're so caught up in your public service
You're so lost in what your friends will say I don't need you hanging round me
I don't need you in my ear
I don't need your conversation
I just wish that you would disappear You say it's only 'cause you're worried about me
I'm not worried so why should you
You better get another occupation
There's got to be something else to do I don't need you hanging round me
I don't need you in my ear
I don't need your conversation
I just wish that you would disappear
