

Colour Blind

Poly Styrene

Now let the music play I can see the rainbow high in the sky
The beauty of the colors as the clouds flow by
But when it comes to my brethren, I and I
Just simply choose to remain co-color blind I can see duality day and night
The contrast of the colors is very, very bright
But when it comes to my brethren, I and I
Just simply choose to remain co-color blind Color blind all the way
So me tell you, little lady
[Incomprehensible] to you, darling
Color blind in baby eyes make, yo
I can see the color of 3D films
The color of my makeup and metallic wheels
But when it comes to my brethren, I and I
Just simply choose to remain co-color blind I can see graffiti and day-glo spray
The color of the sun, the moon and Milky Way
But when it comes to my brethren, I and I
Just simply choose to remain co-color blind Color blind in every way I will stay
Now music on disco
Play ball to make you rockers all stay Now we got to stick together
And don't you watch no color
You love on one another
Like a sister and a brother
[Incomprehensible] between the ear
I don't play no color, [Incomprehensible]
I can see diamonds and emeralds too
The infrared light and my silver shoes
But when it comes to my brethren, I and I
Just simply choose to remain co-color blind I can see Krishna who is sky blue
The color of my lipstick pink and purple too
But when it comes to my brethren, I and I
Just simply choose to remain co-color blind
