

Help Me

Shalamar

There comes a time in all of our lives when we realize.
Individuals can't stand alone you need someone to call your own.
And I want be the one you need but you got to open up to me cause.
It takes the two of us to make it happen.

Help me

Show me what you want me to do

Baby and I'll do it all.

Help me

I know you're searching for the same thing too girl won't you help me out?

For too long I've been lost and alone filled with many changes

But since I met you girl I can't deny I sense a new beginning

So from here we can conquer our every dream

With a love that no one else can bring so

Let's build a life together you and I won't you help me?

Do us both a favor right now

Your love I'll never doubt

But you got to help me

It takes the two of us to make it work out.

Mmm

Help me

Ooh baby show me

Exactly what you want me to do

Won't you

Help me

Oh baby show me

Baby tell me that with me is where you want to be

Wah woh

Help me

Ha wa woo

Understanding is the key

I can give it all to you but you got to help me

Girl won't you help me?

Baby

Understand that with the key

I'll give it all to you but you got to help me

I need to know

Understand that with the key

I'll give it all to you but you got to help me

Oh show me baby

I care what my friends think I should do
When it comes to you girl
Cause I just want to be right by your side
As your lover and your guide
I've been looking for all of your qualities
And I know you can bring out the best in me cause
A love like ours could last if you just give in and
Help me
Show me what you want me to do, baby
And I'll do it all
But you got to help me
I know you're searching for the same thing too
Baby help me
Help me
Come on girl show me
(Understand that with the key I'll give it all to you but you got to help me)..... Repeating
Woo baby woo come on and
Help me
Baby tell me exactly what you want me to do
Come on and show meRepeating
Understand that with the key I'll give it all to you but you got to.....
