

Can't Help Falling In Love With You

Beau Badrick

So many times you closed the door
On all the times I tried to walk through
But the worst is over
I found you still and
I can't help falling in love with you now

Everything you put me through
It's like it doesn't even matter
'Cause the worst is over
You're such a thrill and
I can't help falling in love with you now

Well baby, lets go back
to before we ever met
Can we both just decide
to leave the past behind us,
I have been a mess but
now we're moving on
I was so wrong
to let my words get in the way
of what I want to say
what I wanted to say was
Im falling in love with you, now

So many things I left unsaid
So many things I can't remember
But I see you clearly for what you are
and I can't help
falling in love with you now

Well baby, lets go back
to before we ever met
Can we both just decide
to leave the past behind us,
I have been a mess but
now we're moving on
I was so wrong
to let my words get in the way
of what I want to say
what I wanted to say was

Im falling in love with you

And I hope you can forgive me
I've got your love and i'm taking it with me now,
and I can't help falling in love with you now,
No I can't help falling in love with you now
