

# Julie

## Take That

Julie, what's your problem?  
Won't you tell me what's going on?  
'Cause there's a dark cloud hanging over you  
You've been down, down, down for too long You used to sing sha, la, la, la, la, I want you  
Sing sha, la, la, la, la, I do  
There's a band outside  
And they're playing now for you, for you Julie, come to your window  
Don't let your problems spoil the view  
It's not a good day to cry today  
So come on change, change, change  
Come through the door You used to sing sha, la, la, la, la, I want you  
Sing sha, la, la, la, la, I do  
There's a band outside  
And they're playing now for you You used to sing sha, la, la, la, la, I want you  
Sing sha, la, la, la, la, I do  
There's a band outside  
And they're playing now for you, for you Why, why, why do you cry, cry, cry?  
You should know by now that the sun comes out for you  
Why, why, why do you cry, cry, cry?  
You should know by now that the sun comes out for you  
that the sun comes out for you You used to sing sha, la, la, la, la, I want you  
Sing sha, la, la, la, la, I do  
There's a band outside  
And they're playing now for you, for you You used to sing sha, la, la, la, la, I want you  
Sing sha, la, la, la, la, I do  
There's a band outside  
And they're playing now for you, for you Sha, la, la, la, la, I want you  
Sha, la, la, la, la, I do
