

Can't Take That Away

Uriah Heep

He read his lines right on cue
He had perfect time
But who would think that in his life
He would turn to crime They said it must have been an act
The role he had to play
A stage too far the spotlight glow
He chose to throw away Twilight fills his narrow room
The memory of sweet perfume
And you can't take that away
You can't take that away
There's one thing in life that you do best
Just do it well
And you can't take that away
Now that he is forced to choose
And find something to do
Scraping walls with verse and rhyme
To help him to go through But still the thought of who he was
Sneaks into his head
Between those dirty sheets
He's better off alive than dead Twilight fills his narrow room
The memory of sweet perfume
And you can't take that away
You can't take that away
There's one thing in life that you do best
Just do it well
And you can't take that away
No you can't take that away
There's one thing in life that you do best
Just do it well
And you can't take that away
Looking back on better days
He tries to understand
Why he never asked someone
To lend a helping hand The price he paid was governed
By the grass that was so green
The headlines hit the world
And wiped him off the silver screen Twilight fills his narrow room
The memory of sweet perfume
And you can't take that away

You can't take that away
There's one thing in life that you do best
Just do it well
You can't take that away
No you can't take that away
There's one thing in life that you do best
Just do it well
And you can't take that away
