

Shadow Man (feat. Rockit)

Rockit Gaming

Verse 1:

We've always said turn the power on first

Multiple switches fuck it, what could be worst?

Four tombstones hovering above us, shoot 'em left to right see the symbol glowing bright

I hear a sound to spawn a keeper and i need to build the alter, going to older maps be careful never faulter start
the ritual need a break it takes awhile back to the begining, nacht der lifestyle

Ha, I'm almost halfway there this ritualistic zombie love affair

Lets head up stairs

Nacht Der Untoten lets open up the apothicon its awfully big, so we can pack-a-punch again

So what I'm having a party with all my Lil' Arnies, I'm throwing them into the holes with all the zombies
spawning, defeat the three headed beast that we call the marguas to produce the second tape, lets go and play it
on the stage

Chorus:

I'm sorry this must be the end

Its been so long with you my friends

This is our time to say goodbye

Revelations, Revelations (so goodnight)

The shadow man taking over my soul

This is the end and i already know

Revelations but im still wanting more

No i never gonna quit

This legacy will never end

Verse 2:

We gotta get the appothicans servant

Upgrade it trust me its worth it

Estoom-Oth, what have i done

I know its a bit long, did i lose your attention

So I'll just pretend that you're still listening

We've been going for so long but we're almost done

Now lets go around the map shooting slabs

S.O.P.H.I.A shows up shoot her in the back

Its time to interact with the engines in fact

They've become turrets shooting blue orbs to be exact

Go to S.O.P.H.I.A's house grab the book and get back deliver all the eggs and get the final artifact

So understand I promise that I'm almost done

Four phases like a boss battle, yes i've won

The summoning key is the only thing that i want to finish the game, be done once and for all

Chorus:

I'm sorry this must be the end

Its been so long with you my friends

This is our time to say goodbye

Revelations, Revelations (so goodnight)

The shadow man taking over my soul

This is the end and i already know

Revelations but im still wanting more

No i never gonna quit

This legacy will never end

Verse 3:

So now we gotta kill the shadow man

He disappears in the Apothicon

Thats our cue to hit the Kronorium

I've waited eight long years to say

THIS IS THE END

THIS IS THE END

chorus:

I'm sorry this must be the end

Its been so long with you my friends

This is our time to say goodbye

Revelations, Revelations (so goodnight)

The shadow man taking over my soul

This is the end and i already know

Revelations but im still wanting more

No i never gonna quit

This legacy will never end I'm sorry this must be the end

Its been so long with you my friends

This is our time to say goodbye

Revelations, Revelations (so goodnight)

The shadow man taking over my soul

This is the end and i already know

Revelations but im still wanting more

No i never gonna quit

This legacy will never end
