Resistance Is Futile

Jets to Brazil

there's glass in this rug
tiny splinters pass
all just missiles to bloodstream
the lead in water collects in liver
all just signals inside me
pass me the remedy get this chip out of my head
subjects wants to come down - refuses lead
there's gas in one lung should we need it
silly rabbit, you can't see
our team of crackerjacks is at full readiness
you treason angel we'll find you
on the head of a pin in the hair of another angel
subject wants to come home but it's not time
pass me the remedy get this shit out of my head
subject wants to come down - refuses lead
you're never too small for our attention
you watch tv while we watch you
you're never too small for our attention
you're never so small that we can't see you
