

# All Fall Together

## Big Country

I forget how it started  
But everyone knew of the cause  
Hard out of the sun with a vengeance  
And all was then lost They crawled into homes  
And yet all of the old ways were gone  
It left nothing to run to  
But no one can help how they're drawn We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever Survivors set out on a trail  
In the search for salvation  
Looking for remnants of sense  
In the end of a nation We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever All fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever All came together  
And steadied themselves on the shore  
Knowing the terror  
Would find them much worse than before We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever Nothing to live for  
And nothing more left of your pride  
Can you face all the black  
In your heart that will not be denied? We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever
