

My Baby Ruby

Golden Earring

I sit here and I'm drinking
Drinking away her name
But God knows if it will help
Until now she still remains
And every glass and every hour
Deeper I will sink
so wondering if it will help
come on buddy, buy me a drink

Think about my baby, think about her right now
Come on give me the bottle, the bill don't talk about it now
Think about my baby, I think about her right now
The moment I knew she was living, I had to get her anyhow
My baby Ruby, she's groovy
And every time I call her name
She looks at the sky, for me no eye, oh yeah
