

Come Over

Jennifer Lopez

One, you come to my room for a little game
To you, I'll do very erotic things I wanna make love, babe, very slowly
Three times in a row, all night I'll go I love when you come over
Please come over
And when you come
It gives me fever Body next to mine
Love dance syncopated time
Sugar rush keeps me high
Sweet kiss on my thigh
I wanna make love, baby, very badly
Feels good in the air every time you're here I love when you come over
Please come over
And when you come
It gives me fever Don't keep me waiting, anticipating
Love, I am saving for you
Hear what I'm saying
You I am craving
Love is here waiting for you
All day you're staying
Please no delaying
Patiently waiting for you
Don't keep me waiting
No time for playing
Sitting here waiting for you, come over I love when you come over
Please come over
And when you come
It gives me fever Come over I love when you come over
Please come over
And when you come
It gives me fever I love when you come over
And when you come
It gives me fever I love when you come over
