Unknown Road

Pennywise

So you're currently content with your surroundings

You possess a vague sense of accomplishment

You give all you had to give, did you give conservative

Think that all the years that passed you by we're all well spentPictures of everyday life spark memories

And certain things pull triggers in your mind

What would be different now if you were there than here

What passages, what fantasies lie just beyond the unknown roadDo you know, the miracles that could be found

They're waiting down the unknown road, so it goes

A few more cornerstones that could be yoursEver get the thought you were mistaken?

Ever think about the stones you've left un-turned?

More chances slip away with every passing day

Suffering with cold you're so afraid, you might get burnedAnd wondering can take it's toll yeah

And wondering you can rack your skull

And wondering can send your imagination up a tree

Wondering what fantasies lie just beyond the unknown roadDo you know, the miracles that could be found

They're waiting down the unknown road, so it goes

A few more cornerstones that could be yours Time is right now of the essence

Time is right to learn your lessons

Time is all on your side

Time is all that you have leftThings you've, you've contemplated

The unknown road is one

Things you've, you've contemplated

The unknown road is one

Things you've, you've contemplated

The unknown road is one

Things you've, you've contemplated

The unknown road is one
