

Casual Goodbye (Epstein's Galloping Gertie Remix)

Bear In Heaven

it's a casual goodbye, goodbye
off the mountainside
seen but not for long, too long
as our lights look down the road casual we ride, we ride
to the mid day light
casual we drive, we drive
off the mountainside
and the ground, it's closing down
out run it
it's a casual goodbye off the mountainside
seen but not for too long, too long
as our lights look down the road
casual we ride through the big blue sky
and the ground, it's closing down
out run it
out run it
out in our place filled with lost existence
you'll fall forward because...oh no, my friends
i think we've turned into a big mistake
but those are the breaks
for having fun turning away from the high road
we should find a flock of birds big enough
to pull us up
from the low road
come on
come with us
we are falling straight down, so turn us up
loud and clear
before we crash in the ground
