Love Is Real

Theophilus London

I fell in love with a disco queen
In the heart of the city at a bistro scene
A long story short, she come up north turned our house to the port
We took a trip down Mexico, and I nearly shout myself like plexico
But with a mouth so fast she was technical
And don't turn to a vegetable

Hey, you walk to the sun, I sleep through the day
But nothing more
The sky lit up the stars, we're miles apart
Look up where you are
Is that what you want, 'cause love is real
Just have a good time
Is that what you want, 'cause love is real
Just have a good time

Catch rest in the motel room
When the roosters call I escape this doom
The humming bird is the humming man
Six years later you will understand
I spoke four words from the last night, night, yikes
In the mother land for another life for another man

Damn, you walk to the sun, I sleep through the day
But nothing more
The sky lit up the stars, we're miles apart
Look up where you are
Is that what you want, 'cause love is real
Just have a good time
Is that what you want, 'cause love is real
Just have a good time

Try make the most of this
Don't throw it all away
She had to change her number twice
And no time to count the days
She the disco queen, party all night like her shit's so clean
If you look those eyes, it might be me in the deep skies

You walk to the sun, I sleep through the day

But nothing more
The sky lit up the stars, we're miles apart
Look up where you are
Is that what you want, 'cause love is real
Just have a good time
Is that what you want, 'cause love is real
Just have a good time

You walk to the sun, I sleep through the day
But nothing more
The sky lit up the stars, we're miles apart
Look up where you are
Is that what you want, 'cause love is real
Just have a good time
Is that what you want, 'cause love is real
Just have a good time

Is that what you want, 'cause love is real
Just have a good time
Is that what you want, 'cause love is real
Just have a good time
