

# Party On the Moon

Vanessa Hudgens

Is anybody out there [repeat 4x]

Oh, so crazy  
Martians invading  
We're on the moon, whoa, whoa  
It's astrologic, meteors droppin'  
Whoa, yeah

It's like a rocket, rocket  
You can't stop it, stop it  
Once we blast off  
We're on a lunar mission  
This isn't science fiction  
Leave your troubles on earth, take my hand

[Chorus]  
We're gonna escape  
We're defying gravity  
Somewhere in the galaxy  
There's a party on the moon and you're invited  
Bring your friends too, it's so exciting  
We're defying gravity  
Somewhere in the galaxy  
There's a party on the moon and you're invited  
Bring your friends too, it's so exciting  
Yeah, yeah, yeah  
Party on the moon

Is anybody out there  
Is anybody out there

Oh, star chasin'  
Thruster's a blazin'  
We're on the moon, whoa, whoa  
I see milky way hotties, so beam me up scottie  
Whoa, yeah

It's like a rocket, rocket  
You can't stop it, stop it

Once we blast off  
Houston we're havin' problems  
And I know how to solve 'em  
Just leave your troubles on earth, take my hand

[Chorus 2]  
We're getting away  
We're defying gravity  
Somewhere in the galaxy  
There's a party on the moon and you're invited  
Bring your friends too, it's so exciting  
We're defying gravity  
Somewhere in the galaxy  
There's a party on the moon and you're invited  
Bring your friends too, it's so exciting  
Yeah, yeah, yeah  
Party on the moon

Intergalactic, whoa  
Time is elastic and everyone knows it  
When your world is static  
Leave your troubles on earth take my hand  
We're gonna escape...

[Chorus 2x]

Yeah, yeah yeah  
Party on the moon

Is anybody out there (anybody)  
Is anybody out there (hey)
