

Footprints

Barenaked Ladies

I've followed footprints in the snow
Never knowing if I was right behind you
 Looking down, no one would know
I wasn't walking hand in hand beside you
 For your footprints lead the way
To a hearth where hearts we made surround you
 You are awash in all its glow
I'm still standing in the snowI stood and watched the lights go out
 While the snowflakes settled all around me
 Though it filled my heart with doubt
Couldn't move and this is where you found me
 As our footprints disappeared
 Snow erasing how I came to be here
 I've got nowhere else to go
 Now you're standing
 In the snow
 Look for understanding
 In the snow
 You look just outstanding
 In the snow
Standing in the snowNow it's almost Christmas Eve
And I'm surrounded with the sound of laughter
 To give is better than to deceive
 For I received a happy ever-after
 You might have left me in the cold
A fitting ending for the fool that I was
 But you'd be cuddled up alone
 And I'd still be standing in the snow
