

The Son of the Forest

Eternal Tears of Sorrow

Snow under roaming feet, ice in the ground so deep

I wander to the north in the freezing storm

Trees of the silent night want me to have a hike

Together we shall be like a father and a son
One with the woods, the son of the forest, the name from the past
Peace from inside... The silence of the winter, forever may it last
Clouds in the darkened sky know I'm one with
the night

What could I need from the distant world?

Wind blows over my head, blood of the bear to be bled

It's cold out there but I don't feel cold
One with the trees, the son of the forest, the name from the past
Peace from inside... The silence of the winter, forever may it last
