

The One (Version 2) [Bonus Track]

Jennifer Lopez

Takin' away
The fact that I care about you, it's just your way
So sweet
Everything seems right around you
Did you know, that you
Have this common way about you
When you touch
And I wanna know
If I could be your girl The one who puts her arms around you
The one who lays her head beside you (your girl)
The one who listens when you need it
When no one else is, I could see it (your girl) The one who knows when something's wrong
The one who knows your favorite song (your girl)
The one who all your family loves
The one you place no one above I'm happy to say
In a lot of ways you've changed me, makes me smile
When you said you were glad the day you found me
I'm wishin' away
Any harm that might ever find you, heaven knows
I really feel I'll always be your girl The one who puts her arms around you
The one who lays her head beside you (your girl)
The one who listens when you need it
When no one else is, I could see it (your girl) The one who knows when when something's wrong
The one who know your favorite song (your girl)
The one who all your family loves
The one you place no one above (your girl) Your girl your girl your girl
I just wanna be (the one who's true to you)
I just wanna be (the one who makes you smile)
I just wanna be (the one who holds you down)
Your girl your girl your girl (your girl) The one who puts her arms around you
The one who lays her head beside you (your girl)
The one who listens when you need it
When no one else is, I could see it (your girl) The one who knows when when something's wrong
The one who know your favorite song (your girl)
The one who all your family loves
The one you place no one above (I wanna be your girl) The one who's true to you and down for you
The one who makes you smile and laughs with you
The one who holds you down, I'm there for you
The one, the one, the one (your girl) The one who's true to you and down for you

The one who makes you smile and laughs with you
The one who holds you down, I'm there for you
The one, the one, the oneThe one who's true to you
The one who makes you smile (got to be your girl)
The one who holds you down
The one, the one, the oneThe one who's true to you (your girl)
The one who makes you smile
The one who holds you down (your girl)
The one, the one, the oneI can be anything you need
