

# Don't It

## Billy Currington

(Hey, hey, hey)  
(Hey, hey, hey)Baby don't say no so quick  
This ain't about me trying to see how far that I can get  
But ain't gonna lie, wouldn't mind just a little bit of you and I  
Eye to eye, lips on lips  
Swaying to the music real close  
We can both use a little let go kind of nightBaby, if you want a good time  
We can get on it  
Just take a shot or you can sip on it  
We'll find a floor, we can dance on it, slow song it  
As far as I can tell that finger ain't got no ring on it  
So come on, baby bring on it  
It's one of those stars forming, love calling  
But get you feeling alright night  
That sounds good, don't it, don't it?  
Every little thing you got you know  
That I want it, want it  
Sounds pretty good, don't it?Well I just now seen that smile  
And I bet it's been a minute  
Since you tapped on into that wild and crazy side  
So baby, let's do this tonight  
Baby, that moon looks just right  
But don't fight itIf you want a good timeÂ we can get on it  
Take a shot or you can sip on it  
We'll find a floor, we can dance on it, slow song it  
As far as I can tell that finger ain't got no ring on it  
So come on, baby bring on it  
It's one of those stars forming, love calling  
But get you feeling alright night  
That sounds good, don't it, don't it?  
Every little thing you got you knowÂ  
That I want it, want it  
It sounds pretty good, don't it?So baby, let's get on it  
You're gonna love it, you can bet on it  
Karaoke, we can microphone it, whatever you want  
As far as I can see that finger ain't got no ring on it  
So come on, baby bring on it  
It's one of those stars forming, love calling  
But get you feeling alright tonight

Sounds good, don't it, don't it?  
Every little thing you got you know  
That I want it, want it  
And it sounds pretty good now, don't it? Yeah, don't it? (Hey hey, hey)  
Get you feelin' alright girl  
Yeah, sounds pretty good, yeah don't it  
Yeah, don't it baby? (hey hey, hey)  
Oh  
Yeah sounds pretty good now don't it
