

She's Got a New Spell (Alternate Version)

Billy Bragg

What is that sound?
Where is it coming from?
All around
What are you running from? Something you don't understand
Something you cannot command
That's how I know
She's got a new spell Yes, that's how I know
That she's got a new spell
What's going down?
Who's moved this room from round me? Where has it gone?
I fear this night will drown me
So I lie awake all night
'Cause I can't sleep with something I can't fight The laws of gravity are very, very strict
And you're just bending them for your own benefit
One minute she says
She's gone to get the cat in The next thing I know
She's mumbling in Latin
She cut the stars out of the sky
And baked them in a pie She stole the scene and scenery
The script and the machinery
