

# Shangrila

## EnstrÃ¼mantal

I'm bathing in warm liquid colour  
Feel every cell in my body is music  
    Floating in hyperspatial sound  
Visualizing the landscapes of my mind  
    I'm opening the door to inner space  
    I'm feeling the vibrasound  
        We can live forever  
        We can live forever  
        Strike that gong  
        We can live forever  
    Our love can live forever  
        In shangrila  
    Transform with inner guidance  
    To a place of peace and paradise  
        (oh what a feeling)  
Relax let your thoughts drift away  
        (oh what a feeling)  
    Live in belief and harmony  
        (chance of freedom)  
    We can live forever  
    We can live forever  
        Stike that gong  
    We can live forever  
    Our love can live forever  
        In shangrila om  
        In shangrila om

Access your new state of mind  
    Dedication discipline  
    Searching the sensory science  
        Has resulted in shangrila  
        We can live forever  
        (forever & ever & ever)  
        We can live forever  
    Our love could live forever  
        In shangrila  
        We can live forever  
        (forever & ever & ever)  
        We can live forever

Strike that gong  
We can live forever  
In shangrila om  
A piece of a dream  
The color of green  
The color of healing  
In shangrila  
Color of love  
In shangrila  
I feel the sacred healing chants  
I feel the moment  
Of my death  
I feel the higher learning  
I feel the realization of forgiveness  
Compassion and loving kindness  
Om
