Conquest Of Spaces

Woodkid

Stretched to the core of galaxies
Distorted city grids
By a black hole of vanity
Blossoms the age of greedBeyond the laws of density
Towers of glass and steel
Temples and fragments of memories
Drifting away from meI'm ready to start the conquest of spaces
Expanding between you and me
Come with the night the science of fighting
The forces of gravityAfter the gates of prophecies
A million light years away from me
Straight for the eye of destiny
Reaching the point of tearsBehind the dreams of mastery
Love dies silently
Torn to the flesh as the fire bleeds
Echoes of historyI'm ready to start the conquest of spaces
Expanding between you and me
Come with the night the science of fighting
The forces of gravityI'm ready to start the conquest of spaces
Reaching the starlight and silver fields
Come with the night the science of fighting
The forces of gravityI'm ready to start the conquest of spaces
Expanding between you and me
Come with the night the science of fighting
The forces of gravityI'm ready to start the conquest of spaces
Reaching the starlight and silver fields
Come with the night the science of fighting
The forces of gravity
