

# The Ills

M. Sayyid

Woo Hoo  
A baby's born  
The father's gone  
Can't live with what he's done  
You know now mama's torn  
She can't afford  
To raise her son  
You know the ills of this world they can get you down  
You know the ills of this world they can get you down  
But then you get back up  
Way down in New Orleans  
The city screams  
They've gone black and white  
And when the levy's broke

Woo hoo the city float  
And people lost their lives  
You know they needed aid  
They hoped and prayed  
But it was just too late  
And now the family's cried  
They know inside  
Doesn't have to be that way  
You know the ills of this world they can get you down  
You know the ills of this world they can get you down  
But then you get back up  
You know the ills of this world they can get you down  
You know the ills of this world they can get you down  
But then you get back up
