In Your Mind

Nicotine

Tell me baby how you want to be
Woo baby, it's hard to realize
So close your eyes and then think about
The day we've first met by the beach
At the bottom of your imagination
In your mind In your mind In your mindEvery time I see you in my dream
You sing along with me the song
Leave me the memory you have
So that I can remember you
Leave me the record that you have
So that I can play the song for youTell me baby where you want to go
Well, it's hard to realize
So close your eyes and then think about
The day we've first met by the beach
At the bottom of your imagination
In your mindEvery time I see you in my dream
You sing along with me the song
Leave me the memory you have
So that I can remember you
Leave me the record that you have
So that I can play the song for you
