

# Too Much CSI

## Greeley Estates

Best night of my life  
The blood and dirt remind me that I'm alive  
I failed to see this coming  
When all the signs pointed at you I should have known it was you  
I should have seen in your eyes It's twisted how you set me up  
I never thought that you were who you are  
To think I trusted in you  
When this was always part of your plan I should have known it was you  
I should have seen in your eyes Tie me up behind this truck  
So that I won't forget you  
Keep dragging me just like you are  
You know I won't forget you face I'm holding on for my revenge  
'Cause if I die tonight then you get away  
The pain is not the issue  
Just think of what I'll do to you I should have known it was you  
I should have seen in your eyes Tie me up behind this truck  
So that I won't forget you  
Keep dragging me just like you are  
You know I won't forget your face Forget you face, your face  
Forget your face I can taste my sweet revenge  
You know that we'll meet again  
I can taste my sweet revenge  
You know that we'll meet again I failed to see this coming  
When all the signs pointed at you Tie me up behind this truck  
So that I won't forget you  
Keep dragging me just like you are  
You know I won't forget your face Forget you face, your face  
Forget you face, your face
