

Hope Street

Stiff Little Fingers

So you're living on a false reputation
You're a big man in this town
And it seems by your own estimation
That you're a character of renownBut it's all deceptive
Your facade's defective
Yet it's what's expected
When you're really just the same as all of usYou're living on hope street
(Living on hope street)
You're living on hunger and desire
You're living on hope street
(Living on hope street)
And I hope that you never lose the fireWhole lives lived under the burden
The strain of the buying age
Believe me, I know it for certain
That you can break from the cageBy holding your head high
Get a little self pride
Self respect on your side
And you'll find that all the doors fly open wideYou're living on hope street
(Living on hope street)
You're living on hunger and desire
You're living on hope street
(Living on hope street)
And I hope that you never lose the fireAnd all the problems at your door
Don't let them bother you no more
Just take them all down one by one
You'll find they fall apart
If you face them with head and heart
And what was hard doesn't seem so hard no moreYou're living on hope street
(Living on hope street)
You're living on hunger and desire
You're living on hope street
(Living on hope street)
And I hope that you never lose the fireYou're living on hope street
(Living on hope street)
You're living on hunger and desire
You're living on hope street
(Living on hope street)
And I hope that you never lose the fire
