

Take It Away

The Butterfly Effect

What's with you making me sick

I know the reasons why

You cut to the quick but still I try

Its all I can see and so it goes

What can you take from me You can take it away Heres the trip, yeah, you think too much

I know the reasons why you're so out of touch

And so it goes, its all you can take from me You can take it away I know it's you, I guess you disagree Take it
away, take it away

Take it away, take it away

You can take it away on me You know why, you take it away You can take it away, from me

No, I won't buy it
