

# Mistral Wind

## Heart

Advisory - the following lyrics contain explicit language:

No wind when I took the watch, my ship was still waitin'  
I lay on that mirrored sky, a restless sail waitin'  
I closed my eyes, said the words of will for the gentle breathin'  
That moves the sea, make my sails fill Whisper waves cloud the glass, awake at last like a lover  
It rushed around the talkin' sweet, roll over, roll over, roll over  
And in my ear he blew his name, it sound so strange  
But I heard it plain mistral, mistral wind I have always held the wheel but I let the wind steal my power  
Spin me 'round, lose my course, nights run by like hour  
Well, show me the way to the deepest mountains  
Too high and beautiful to be a mistral, mistral wind All the hours on the watch, I wait for that breeze to move me  
Ooh, move me, move me, move me  
Blow me back to that place, magic space all through me  
And I sigh your name over the empty water  
You made a crazy dreamer out of me, yeah  
Mistral, mistral, mistral, mistral
