

Too Late for Us

Weeping Willows

I stare into the black
The light's out again
This time there's no turning back
Dawn will crack to guide my way I'm standing on the edge
I can't shy away
I have to cross that bridge
It's time to quit the game we played Too late for us
Words lost their meaning here
The line is crossed
There's nothing left of us
We're on our way, but I don't know where
You used to make me laugh
But we ran out of jokes
Now that you just make me sad
All we have is stones to throw We only get one life
And it won't wait for me
We have to make it right
We have to try to live our dreams Too late for us
Words lost their meaning here
The line is crossed
There's nothing left of us
We're on our way, but I don't know where
Too late for us
Words lost their meaning here
The line is crossed
There's nothing left of us
We're on our way, but I don't know where...
