

Pick a Fight

Goldfinger

I can't be happy without you
You can't be happy without me
Still you always wanna pick a fight now
You say it's written in the stars
Some psychic read it in my cards
Still you always wanna pick a fight with me You say that I'm the only one
The one you're looking for
Try and keep a straight face when you laugh
You talk to me like I'm a saint
But all your friends just say
We have been so over for some time And I know that you had the best intentions for me
I know that what you're saying is goodbye I can't be happy without you
You can't be happy without me
Still you always wanna pick a fight now
You say it's written in the stars
Some psychic read it in my cards
Still you always wanna pick a fight with me You say you changed your mind again
You don't know how you feel
Give me some more time is what you say
You wanna use me like a toy
That you get bored with
Now you wanna store me far away And I know that you had the best intentions for me
I know that what you're saying is goodbye, goodbye I can't be happy without you
You can't be happy without me
Still you always wanna pick a fight now
You say it's written in the stars
Some psychic read it in my cards
Still you always wanna pick a fight with me I can't be happy without you
Can't be happy without me
Still you always wanna pick a fight with me
I can't be happy without you
Can't be happy without me
Still you always wanna pick a fight with me You always say what you don't mean
You always say the things that hurt me
Why do you pick a fight with me?
You always say what you don't mean
You always say the things that hurt me
Why do you pick a fight?
Why do you pick a fight?

You always pick a fight with me
