

# Deadspeak

## Severed Savior

Cast aside the light  
Bringing forth the darkness  
Shadows overcasting  
I can see the other side  
Open up the portal into hell  
Destroying every planet in our galaxy  
I can see the other side, can you?  
Constellations prove that we'll breed our life until our sickness  
Burn for me  
I have seen this other side of life  
Burn me  
Melt away my skin  
I am one with death  
Death will take it's toll  
I have seemed to be lost in my own life  
With pain and misery  
I have seemed to be lost in my own life  
With pain and misery  
I have seen the other side of life and my demise  
Calculate my escape  
I come forth from this wasteland with my death  
I have become one with the flames  
Why is this happening to me now?  
Exiled to infinity  
Blood filled the seas and the hatred in existence crossed  
Formed this timeless mass  
Supplicated death  
Horried divinity in me  
Through and through the cycle of hate grew in me When I bled  
I am dying with myself  
In my hell  
We are one  
One with hate  
In our self it will bleed  
We are one  
One with death  
In us it will be
