

Electrify

Beastie Boys

Electrify

Electrify

Electrify

Words comin' forth like water from the tap

Clap track line the spaces, places, papers, people stack

Back track through the minutes when the thoughts went insane

I pulled the picture off the cover and blew out the mind games

And people say, this is the play list of the void not found

But I can say, this is the plainness of the peace I've found

It's not the sorrow or the pity that we hope to dismantle

It's just the cast of past life, lighting both ends of the candles

Scandelest in the means, I have dreamed on the schemes

Reunited in the times of such picturesque scenes

Can I get a witness to testify?

Open your eyes, realize, electrify

Electrify

Electrify

Electrify

So I plan and I scam and write it off on my taxes

It's times like these I've just gone with the decisions of the masses

And to the crowds who've come before with their profit massing ways

I took to the greed that fucked it up and brought it down to today

With pain I stand sane and remain holding strong

Whilst all around me, those who clowned me

Are now drowning by the throngs

Its illogical, the actions that are typically displayed

A set back ain't all that much problem to invade

So I will glow like a lantern on a new moon night

I'll fight violence with these hands that weren't built to fight

But like a furnace burning coal, my goals are bound to burn in flames

Whether achieved or dismantled by the agendas displayed

Can I get a witness to testify?

Open your eyes, realize, electrify

Electrify

Electrify

Electrify
