

# Q (The Best One of Our Lives)

## Evans Blue

Are you saying love or are you saying nothing?  
Still life is a crime that I can't ignore  
Your perfect ways will follow  
The temperature that's rising  
All this time you never let me think It was the hardest part to know  
It was the fastest we could run  
It was the farthest we could go  
We are alive, my angel Carcerated, a tougher ending  
It sounds so easy  
But every time we were supposed to let go  
We'd make love  
Now, pull me closer, let the heat take over Cut me away, cut me away  
Don't end it up and  
I tried to love you like before  
If this was a night  
It was the best one of our lives Are you saying now or are you saying never?  
The still frame in my mind cannot be ignored  
And all I can remember  
Is the way you moved your body  
And how your lips never said no But it was killing you inside  
'Cause you thought I was the one  
And now it's out of your control  
You have arised my angel Carcerated, a tougher ending  
It sounds so easy  
But every time we were supposed to let go  
We'd make love  
Now pull me closer, let the heat take over you, you And we're were drawing lines not to cross  
So we would never feel a thing  
And now it's breaking you apart  
Just like it broke your heart Carcerated, a tougher ending  
It sounds so easy  
But every time we were supposed to let go  
We'd make love  
Now pull me closer after he'd take over Cut me away, cut me away  
Don't end it up and  
I tried to love you like before  
If this was a night  
It was the best one of our lives
