

Satellite

Nine Inch Nails

Data trails, black fingernails
Scratch across, the sky
Hard to know, figure out
Tell the truth, from lies
Everywhere, listening
Ever word, you say
Think I found, a way around
Yeah, I think I found, a way

Come on

Come on

Come on

Come on

Come on

Satellite, I'm watching you

I'm one step, ahead

Satellite, I'm part of you

I'm inside, your head

Yes we can, yes we did

Eliminate, the spread

Better watch, what you think

What was that, you said?

Everywhere, and everything

And every word, you say

Think I found, a way around

Think I found, a way

Come on

Satellite, I'm watching you

I'm one step, ahead

Satellite, I'm part of you

I'm inside, your head

Satellite, I'm watching you

I'm one step, ahead

Satellite, I'm part of you

I'm inside, your head

Satellite

Satellite, I know you're up there somewhere

Satellite, I know you're up there somewhere

Satellite, (so very high)

I know you're up there somewhere

Satellite, (so very high)
I know you're up there somewhere
Satellite, (so very high)
I know you're up there somewhere
Satellite, (so very high)
I know you're up there somewhere
Satellite, (so very high)
I know you're up there somewhere
Satellite, (so very high)
I know you're up there somewhere
So very high
So very high
