Step One

The Suicide Machines

Compassion is at a stand still
Desensitized this day, never know
If we will make a change this way
I'm gonna try this time
Can you try this time?
We're gonna try this time
Don't wanna cry this timeThe factories down the river
They illuminate the sky
Homeless people shiver
Profit is the reason why
You try to fight the symptoms
But you don't fight
The disease
In some sense, you've done something
But it is your conscience
That you pleaseProgress, greed, their war machines
You've done
I've done
We've done nothingSo desperate to say something
But it's all just empty talk
Talk and talk but do nothing
While resources they exhaust
Poisoned air, polluted seas
Cancered bodies, burning trees
Sometimes I don't understand
War, death, disease, famine
