

# Just Try

## The Dandy Warhols

You came to me with open arms  
To take away my fears  
I took you in and you stayed a while  
You lived with me right here  
You told me to believe in something  
Something that's true  
Like the mountains and the deep blue ocean  
So much bigger than you  
You said: Just try  
Come on, just try  
Just try  
Just try  
Just try  
I offered you a place to stay  
Somewhere to rest your head  
The Lord knows I need you here  
There were something you said  
You'll have to believe in something

Something bigger than you  
Like the great white open spaces  
There's religions too  
She said: Just try  
Come on, just try  
Just try  
Just try  
Just try  
You gave me more than I deserved  
You gave me peace  
You gave anything i loved in this world  
And now I have to sleep  
Just let me sleep...  
Just try  
Just try  
I have to sleep  
Just try  
Just try
