

Take a chance

Stockton's Wing

Take a chance Stocktons Wing

As the evenin' rolls, the noise it grows
life is busy out on the street
You stand a while with vacant eyes
lookin' for a face you'd like to meet

and would you take a chance, meet me wherever you please
leave your cares for a while
if we could walk the miles that keep us apart
we could free these dreams locked inside

You always said we'd meet again (we'd meet again)
and never wanted to be alone (i never wanted to be lonely)
Well right now my heart is feelin' like a brand new start
i'm waitin to call you to my home

and would you take a chance, meet me wherever you please
leave your cares for a while
if we could walk the miles that keep us apart
we could free these dreams locked inside

Who's that I see, a stranger to me
standin' real close to you
I won't complain, noo, it was always my game
I've lost a lot by losin' you

and would you take a chance meet me wherever you please
leave your cares for a while
if we could walk the miles that keep us apart
we could free these dreams locked inside
