

Lux

Braid

And when the darness soul is on the night
Will rise my shinning soul a side
Falling on, get easy to falling and easy to surreder
Falling on, how said I never leave no better
Let they take me far away
I never fail between the danger and dream
Get the right time to your misery
Four months go with the memory of you
Thought I feel my grimpo on having enough
Let me show you that you can not get up
Anywhere you reach ...
The time won't getting chief and it's strange think you keep it with it
Ring me lot as I try so hard to get this life
Life still, wake up now, feel the stress.is catching on
One more punting on the sesion to lied someone to see you
You kill me in your arms
That goes on, for my mind or for out there you know you
For up there like we both singing on
Sure will get on the way, anyway you wait your dream come by
Lux get a little, you really let's a little, as long as we wish a little more
Let's give a little,
Let's get a little as long as we're here
Let's get a little
Lux get a little, you really let's a little, as long as we wish a little more
Let's give a little
