

# Record High, Record Low

## Givers

Its been a while since we let go  
I ease my way out to a tight rope  
passed a few guarantees  
and dropped it down to new degree do you ever get to push when you pull outside  
just a few tears that you happen to ride  
weigh it on me, just to lay it on me  
I can take anything Was a record high, record low 2x  
Oooooo So pass out trying match and you continue, with your tears  
If you could just stay still  
Wallowing, cut your skin  
well you've come to admit You're reaching out to this opportune  
But I got a feeling it ain't up to you It was a record high, record low  
Ooooo  
2x But as I, took the stairs, I'm  
Turning backwards  
Never saw on the moon and strong, yea I Got the last day out,  
Feel it louder  
With it's softer and better low It's not to fall back, when out of step  
Take it all, take it low  
(Check the status of your heart) We both stand  
Facing right there  
Take it all  
(just a nimble,  
can you feel it,  
check the status of your heart) Can you feel the record high, record low
