

# In Colour

## HeyHiHello!

The rocket that sits in my garage  
It runs on hopes and dreams  
And its bursting at the seams to get out of this town now!  
Ive got a map of the universe and dont know where to go first- But Ill bring back a souvenir  
Here, I thought that  
I was sleeping with eyes closed tight  
And somehow, Id be dreaming in broad daylight  
[I have to wonder] Here I am, a hopeful rocketeer  
With space exploration gear  
Theres room enough for two  
Thats why Im glad I found you here!  
Well go to Jupiter and Mars  
Far above the roads and cars  
So high up in the air  
Here, I thought that I was floating down..and sleeping with eyes closed tight  
And somehow, Id be dreaming in broad daylight  
And when I dream about you so late at night  
Thats when I dream in colour so true and bright [that I have to wonder]  
Late nights spent on the avenue  
Bright lights illuminate the city view  
The air is clear and you can see for miles around  
So high above the earths atmosphere  
Gravity can no longer hold me captive here  
When Im awake all I think about is seeing your town  
I thought that I was hearing a symphony  
Filled with strings that played in twelve part harmony  
And everywhere I go they follow me  
Through the air they play in colour that you can see!  
Here, I thought that I was sleeping with eyes closed tight  
And somehow, Id be dreaming in broad daylight  
And when I dream about you so late at night  
Thats when I dream in colour so true and bright [that I have to wonder]
