

We Found Each Other In the Dark

City and Colour

I heard the church bells from afar
But we found each other in the dark
And when the smoke does finally pass
We will rise above all the ash

Cause we're gonna live
We're gonna live
We're gonna live
At last

So bright
The flames burned in our hearts
That we found each other in the dark
Like the beasts out in the wilderness
we are fighting to survive and convalesce

But we're gonna live
We're gonna live
We're gonna live
Like the rest

Through the dark starless waters
And the cold lonely air
On the rough restless seas
The vessel in deep disrepair
And our swans they started singing
But then oh rejoice
I can still hear your voice

The I heard the church bells from afar
But we found each other in the dark
