

# Sweet November

## The Deele

When autumn first arrived you were my lady  
And love was written in the winter snow  
Then with the change of months there came October  
And now I wonder where that love did go  
It was the second rain of autumn we shared a feeling  
It was such, such a glorious autumn dream, yes, it was  
But like kids we were too shy to say to each other  
That together we would always like to be  
Someday soon I know we'll come together  
Even though our feelings change as seasons do, yes baby  
But maybe sweet November will tell us the story  
That will bring us back the love that we both knew  
When autumn first arrived you said you'd be my lady  
And you promised me that you would never go  
Then with the change of months there came October  
And now I'm wondering where, where did our love go  
It was the second rain of autumn, we shared a feeling  
And it was such, such a glorious autumn dream, yes, it was  
But like kids we were too shy to say to one another  
That together we would always like to be  
Someday soon I know we'll come together  
Even though our feelings change as seasons do  
But maybe sweet November will tell us the story  
That will bring us back the love  
Someday soon I know we'll come together  
Even though our feelings change as seasons do  
But maybe sweet November will tell us the story  
That will bring us back the love that we both knew
