## Monuments

Don't fall behind I don't wanna lose you  
we can repair our eyes in heaven.V1  
It's a white night and without sight  
I force my way through the crowds of sacrifice  
and I started feeling at peace with you  
all this destruction and decay makes me feel sick  
face the facts we can't wake up. We indulge ourselves like pigs  
So I'll eat away the state and force every man to break  
and take a good look at itself and everything  
in the name of humanity in the name of liberty in the name of no god

### Chorus

The pressure is mountain high  
excuses are always the same  
we're living beyond our time  
still it won't make us changeV2

I wanna drown myself in drink so I'm senselessly drunk. Pollution crowds around me and I wanna get fucked  
up.

But before they spend another billion on making it all worse I'm gonna set sail on a mission that we can save  
ourselves

Can we save our selves? Can we save ourselves

I'll trigger a reaction

In Flames

It's beautifully insane

### Chorus

The pressure is Mountain high  
excuses are always the same  
we're living beyond our time  
still it won't make us change  
everything's breaking down  
excuses are always the same  
we're living beyond our time

still it won't make us changeWe've broken everything
