Night Is My Friend

Molly Drake

Night is my friend
For when the busy day goes by,
A sad and lonely heart have I
Night is my friendLong days I spend
And though I go from place to place,
I seek and never find your face.
Night is my friend
For when the lights are burning low
and I am on my own
I close my eyes and then I know
that I am not alone.
For night, in the end
will bring to me that peace of mind
and comfort all true lovers find
Their dreams concern night
Sweet lovely nights,
my friends.
