Nothing More

Guards

I was young, running free
Nothing more, all I need
Let them know who you are (who you are)
Don't look back, you'll go farLets watch it all fall down
Get out before we drown
Moving up never down (X2)What we do, what we choose
Always win, never loose
Make your mark, never leave
Rip it off, let it bleedLets watch it all fall down
Get out before we drown
Moving up never downBut if you leave I hope you do
Take time to see the real truth
And if see me leaving too
Just know I'm always there with youLets watch it all fall down
Get out before we drown
Moving up never down
