Humanure

Cattle Decapitation

The human body, in its systematic nature
Has 3 primary objectives1 Procreate
2 Food intake
3 The elimination of wasteThis is the human equation
One half is feces, the other mammal
The human as shitThis is what you've become
The end result of human stupidity
Another mesh of flesh with no dignity
A solid waste with dull neuronal activity2000 years from now
They'll discover our coprolite
Learn of disease and parasite
Enough to know what made us tick
Enough to make them sickAnatomy
Scat anthropology
The study of manMicturate, here's to your health
Defecate upon the self
Felch the goddamn sphinct
And gurgle it's disgusting contentsPlaying king of the hill
On a mountain of manure
On a planet called earth
Mirroring what we're worthWe are nothing but a failure
Evolution took a shit
In my heart, through these eyes
Humankind in its own shit resides2000 years from now
They'll examine our coprolite
Gain perspective and insight
Enough to know what made us tick
And that we're made of shit
