

# Friends and Alibis

## Escape the Fate

Oh, I hate to be the one to bear the bad news  
Yes, it is true  
I finally fell in love  
I fell so hard that I'm killing myself  
Yes, I need out  
Out of this grave that I've dug And all the friends that I have gone through  
And how much I deserve the pain  
It's a shame So hold your head  
Hold it up high  
Here's to the friends that were alibis  
Keep this close by your side  
When I come home we will have our night Oh, they always told me I was gorgeous in a way  
And that fateful day  
I found who I was  
So fill this hole with my prescriptions  
I just keep feeding my addictions And all the friends that I have gone through  
And how much I deserve the pain  
It's a shame So hold your head  
Hold it up high  
Here's to the friends that were alibis  
Keep this close by your side  
When I come home we will have our night  
We will have our night You were the ones that stood by my side, whoa  
And I was the one that fought all of your fights  
Go! (Hold your head, hold it up high) Whoa  
(Keep this close by your side) Whoa So hold your head  
Hold it high  
Here's to the friends that were alibis  
Keep this close by your side  
When I come home we will have our night Hold your head  
Hold it up high  
Here's to the friends that were alibis  
Keep this close by your side  
When I come home we will have our night Hold your head  
Hold it up high  
Here's to the friends that were alibis  
Keep this close by your side  
When I come home we will have our night  
We will have our night
