

# I Was There

Dwight Yoakam

I was there  
(I was there)  
I was there  
(I was there)

When love crashed and burned I was there I was there when love came around with sweet warm kisses

I was there when it burned into desire  
I was there when it ran into a raging river  
And then turned into a runaway wildfire I was there  
(I was there)  
I was there

(I was there) When love came around I was there

And one thing certain I did all the hurtin'

At love's final curtain I was there I was there when love came in like a living tornado

And I was there when it blew out of control  
I was there when something quickly turned into nothing  
Just a hopeless, helpless dream gone up in smoke I was there  
(I was there)  
I was there  
(I was there)  
I was there  
(I was there)
